(54) Title: TABLE WITH CENTER HANDLE

(57) Abstract: A table includes a table top with a top surface and a bottom surface. A first leg assembly and a second leg assembly are preferably pivotally connected to the table top. The table top is preferably constructed from plastic, such as blow molded plastic, and a connecting assembly may be formed in or attached to the bottom surface of the table top. The connecting assembly is preferably sized and configured to retain a pair of connecting bars. A first support assembly may be connected between one of the connecting bars and the first leg assembly, and a second support assembly may be connected between one of the connecting bars and the second leg assembly. Desirably a pair of handles is attached to the connecting assembly and a spaced is formed between the handles and bottom surface of the table top allow a person to grip the handle and lift the table.
